1 Azoteq USB-dongle usage

The Azoteq USB-dongles available for commercial use are listed in Table 1-1. The dongles are connected to a computer via a mini-USB cable and are used:

- As an interface to program OTP¹ bits which is available on certain ICs (to customize an IC for a certain design), see table Table 3-1 for pin assignment or
- To perform serial communication between computer and IC via
 - 1-wire Communication Protocol see Table 4-1,
 - SPI see Table 4-2,
 - I²C see Table 4-3.

Azoteq provides software used for programming OTP bits. This software is known as USBProg and is intended for prototyping purposes. More information regarding USBProg can be found in application note AZD007.

Azoteq provides software used for the serial streaming of data to a computer utilising the Azoteq USB-dongles. This software is known as VisualProxSense and is intended for prototyping purposes. For some IQS ICs there exists a separate GUI. More information regarding the VisualProxSense application can be found in application note AZD006.

Table 1-1: Azoteq USB-dongles

Azoteq dongle	Description	Device Supported	Data Streaming	Programming
CT120 (EOL)	1 st Generation programmer and data streamer	IQS123	ONLY IQS123	X
CT200 (EOL)	2 nd Generation programmer and data streamer	ALL-Streaming	√*	IQS121, IQS127 _x , IQS128, IQS132, IQS133, IQS142, IQS143, IQS152, IQS156, IQS158, IQS221, IQS240, IQS904 _x
CT210	3 rd Generation programmer and data streamer	ALL	√*	√
DS100	Data Streaming Dongle	ALL	√*	x
RS100 ²	Wireless Data Streaming Dongle	ALL	√*	x
CT220 ³	3 rd Generation In-circuit production programmer and data streamer	ALL	√*	√

* Excludes IQS904_x

¹ One Time Programmable bit – Every bit is only programmable once

² To be used in conjunction with DS100, CT200, CT210 or CT220

³ The CT220 is intended to be used for applications such as in-circuit programming on a production line. For additional information and support, please contact ProxSenseSupport@azoteq.com.

5 Flash Programming (CT220/CT210 only)

The CT210 supports a programming protocol used to program certain flash MCUs (e.g. IQS550, IQS643 & IQS659). The software used for this purpose is Azoteq Flash Programmer. The pinout to perform flash programming can be seen in Table 5-1.

CT pin #	Flash MCU
